Buttons and Navigation

Option 1
Feedback: The layout was good and the client like the vertical navigation bar because when students read the article and scroll down, they can easily access to all the information fast by just clicking buttons. But she would prefer the second navigation bar somewhere else as students will have a hard time change to new pages by keep scrolling up to click.

Option 2
Client Feedback: My client preferred these buttons to the first option as they felt that the 3D effect made the navigation stand out. They were concerned that the buttons in the 'off' state were not as readable as the buttons in the first option.

Final Choice:
